ASPIRING FULL STACK DEVELOPER

EDUCATION

BTech in Computer Science and Engineering

NIST University : 2023-Present

CGPA - 8.47

12th ISC

De Paul School : 2021-2023

Percentage - 90.25%

SKILLS

Frontend : ReactJS, NextJS, Tailwind CSS

Backend : ExpressJS, NestJS, TypeScript

Cloud & DevOps : Docker, Kubernetes, AWS, Git/GitHub, GitHub Actions

Databases : MySQL, PostgreSQL, MongoDB

Languages : Java, C, TypeScript, Python, Rust

CERTIFICATIONS

View certifications on my LinkedIn

- Full Stack Web Development
- Cloud Computing and DevOps
- Data Structures and Algorithms
- Java Development

LANGUAGES

English, Odia, Hindi

SUMMARY

I am an aspiring Full Stack Developer with strong Frontend and Backend skills, along with expertise in Data Structures and Algorithms. My projects demonstrate my capabilities in designing interactive user interfaces and robust back-end systems. I am passionate about developing efficient solutions and am eager to continue learning and improving in the field of software development.

EXPERIENCE

Ex-Intern@Unified Mentor   Nov 2024- Dec 2024
Full Stack Developer

- Developed and maintained responsive web applications using React and Vue.js, ensuring seamless user experiences.
- Designed and implemented backend APIs using Express.js, enhancing application functionality and performance.
- Deployed projects on Vercel and Netlify, optimizing for scalability and speed.
- Created a Weather App showcasing real-time weather updates, integrating third-party APIs and leveraging modern frontend frameworks.
- Collaborated in an Agile environment, contributing to code reviews, debugging, and feature development.

PROJECTS

PassSafeX – A Reliable Password Manager [Link]

Tech Stack : Next JS, Tailwind CSS, ShadCN, Next Auth, Docker, PostgreSQL, TypeScript

- Designed an interactive UI with Next JS and Tailwind CSS for responsive layouts
- Backend using Next JS for handling the client side and server side efficiently.
- Integrated Prisma ORM with PostgreSQL to store encrypted login details securely using bcrypt.js
- Docker for generating the PostgreSQL image and containerizing the application

CodeBriefs – A Markdown Blogpost app [Link]

Tech Stack : Next JS, Tailwind CSS, ShadCN, Next Auth, MongoDB, TypeScript

- Designed an frontend with Next JS & Tailwind CSS and basic backend using Next JS
- Implemented a database for multi-language code storage with MongoDB.
- Next Auth for easy user authentication in the website
